

Commodity Credit Corporation, USDA

§ 1470.24

a research, demonstration, or pilot testing plan consistent with design protocols and application procedures established by NRCS; and

(5) Other information as determined appropriate by NRCS.

§ 1470.23 Conservation activity operation and maintenance.

The participant will maintain and manage existing conservation activities on the agricultural operation to at least the level of conservation performance identified at the time the application is obligated into a contract for the conservation stewardship contract period, and additional activities installed and adopted over the term of the conservation stewardship contract.

§ 1470.24 Payments.

(a) *Annual payments.* Subject to the availability of funds, NRCS will provide, as appropriate, annual payments under the program to compensate a participant for installing and adopting additional conservation activities, and improving, maintaining, and managing existing conservation activities. A split-rate annual payment structure will be used to provide separate payments for additional and existing conservation activities in order to place emphasis on implementing additional conservation.

(1) To receive annual payments, a participant must:

(i) Install and adopt additional conservation activities as scheduled in the conservation stewardship plan. At least one additional enhancement must be scheduled, installed, and adopted in the first fiscal year of the contract. All enhancements must be scheduled, installed, and adopted by the end of the third fiscal year of the contract, and

(ii) As a minimum, maintain existing activities to the level of existing conservation performance identified at the time the application is obligated into a contract for the conservation stewardship contract period;

(2) To earn annual payments for an eligible land use, a participant must schedule, install, and adopt at least one additional conservation activity on that land-use type. Eligible land-use types that fail to have at least one additional conservation activity sched-

uled, installed, and adopted will not receive annual payments;

(3) A participant's annual payments will be determined using the conservation performance estimated by the CMT and computed by land-use type for eligible land earning payments. Conservation performance is prorated over the contract term so as to accommodate, to the extent practicable, participants earning equal annual payments in each fiscal year;

(4) The annual payment rates will be based to the maximum extent practicable, on the following factors:

(i) Costs incurred by the participant associated with planning, design, materials, installation, labor, management, maintenance, or training,

(ii) Income foregone by the participant, and

(iii) Expected environmental benefits, determined by estimating conservation performance improvement using the CMT;

(5) The annual payment method will accommodate some participant operational adjustments without the need for contract modification.

(i) Enhancements may be replaced with similar enhancements without adjustment of annual payment as long as the conservation performance is determined by NRCS to be equal to or better than the conservation performance of the additional enhancements offered at enrollment. An enhancement replacement that results in a decline below that conservation performance level will not be allowed, and

(ii) Adjustments to existing activities may occur consistent with conservation performance requirements from § 1470.23; and

(6) Enhancements may be applied on other land included in an agricultural operation, as determined by NRCS.

(b) *Supplemental payments.* Subject to the availability of funds, NRCS will provide a supplemental payment to a participant receiving annual payments, who also agrees to adopt a resource-conserving crop rotation.

(1) The State Conservationist will determine whether a resource-conserving crop rotation is eligible for supplemental payments based on whether the resource-conserving crop rotation is
